Special offer for RIMA Network members Conference Discounts

The SPRINT Robotics World Conference for Inspection & Maintenance Robotics is an industry-specific event that brings together the global I&M Robotics community. The two-day program includes international speakers, networking opportunities, an evening banquet, the presentation of the SPRINT Robotics Awards winners, panel discussions, and an exhibition showcasing and demonstrating robotic solutions from service and technology providers.

Funded by the European Union's Horizon2020 initiative, RIMA accelerates innovation and the uptake of robotics by helping small and medium-sized companies in various industry sectors. Throughout the span of the four-year RIMA project, SPRINT Robotics has partnered with RIMA, functioning as the central coordinator and main entry point of the RIMA Network Community. This collaboration has led to the discovery of new synergies, exploring the crucial role of I&M Robotics in our society.
